

MEGHANA GUDDANTI

Cincinnati, OH | (774) 393-1098 | g.meghanaa31@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in scalable backend systems, cloud infrastructure, and lifecycle automation. Proficient in Java, Python, and JavaScript with proven work building and operating distributed services on AWS and Microsoft Azure. Passionate about metadata automation, reliable API design, and enabling safe, efficient cloud operations at scale. Pursuing full-time Software Engineering or Cloud Engineering roles beginning mid-2026.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), SQL, C/C++

Cloud & Infrastructure: Microsoft Azure, AWS (EC2, S3, Lambda, IAM), Kubernetes, Docker

APIs & Distributed Systems: REST APIs, Spring Boot, Flask, JSON, JWT Authentication

Databases: MySQL, PostgreSQL, Oracle SQL

DevOps & Observability: Git, Jenkins, JUnit, Selenium, Postman

Data & AI: TensorFlow, Scikit-Learn, OpenCV, PySpark

Methodologies: Agile, Scrum

EXPERIENCE

Software Developer Intern | Aloft Technologies LLC

Dec 2025 – April 2026 Remote, Omaha, NE

- Designed, developed, and maintained scalable Java and PostgreSQL services deployed on AWS (EC2, S3, Lambda), building reliable backend infrastructure capable of handling increased user load under senior-developer mentorship.
- Built and automated workflows for client onboarding using Java, Python, and Git, reducing friction in feature delivery and improving alignment between business requirements and technical implementation.
- Developed secure RESTful APIs and collaborated with cross-functional product and operations teams to implement solutions integrating MySQL and AWS IAM, enabling consistent and auditable access controls.
- Wrote, tested, and debugged production-quality code with automated unit tests, reducing error rates and improving application reliability across deployed services.

Graduate Assistant – IT Team | University of Cincinnati, Graduate College

Dec 2024 – Aug 2025 Cincinnati, OH

- Engineered and supported enterprise IT infrastructure across Windows and macOS environments using Active Directory, Windows Server, SCCM, and Microsoft 365, improving system reliability for campus users.
- Administered authentication and access management via Active Directory and AWS IAM; configured servers, managed backups on AWS S3, and maintained continuous endpoint security compliance and audit readiness.
- Built a Python-based predictive asset management model that reduced hardware failures by 90%, applying automation to lifecycle management of campus devices at scale.
- Reduced recurring ServiceNow incidents by 30% through root cause analysis, improving observability and operational stability of distributed hybrid infrastructure.

PROJECTS

Grocery Store Management System

- Architected a full-stack inventory and order management platform with role-based access control, deploying the backend on AWS EC2 with scalable RESTful APIs secured via JWT authentication and Oracle SQL integration.
- Built interactive React.js dashboards consuming backend APIs, demonstrating end-to-end ownership from data layer to UI.

Plant Disease Detection System

- Designed and deployed a CNN-based image classifier achieving 94% validation accuracy, leveraging AWS S3 and Lambda for scalable inference and Grad-CAM for model explainability — showcasing cloud-native ML lifecycle management.

Sign Language Recognition System

- Developed a real-time ASL gesture recognition system achieving 92% accuracy, integrating a CNN model with a Flask-based API for accessibility-focused web delivery.

EDUCATION

Master of Engineering, Computer Science | University of Cincinnati

Aug 2024 – Apr 2026 Cincinnati, OH

Bachelor of Technology, Computer Science Engineering | Jawaharlal Nehru Technological University

Dec 2020 – Jun 2024 Hyderabad, India
