PROFESSIONAL SUMMARY

Software Engineer experienced in backend systems, automation, and enterprise infrastructure support. Strong foundation in scalable application development and hybrid cloud environments. Seeking full-time Software Engineering or Cloud Engineering opportunities.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), SQL, C/C++
Frameworks: Spring Boot, React.js, Flask
Web: REST APIs, JSON, HTML5, CSS3
Cloud: AWS (EC2, S3, Lambda, IAM), Microsoft Azure
Databases: PostgreSQL, MySQL, Oracle SQL
DevOps/Tools: Git, Docker, Kubernetes, Jenkins
Testing: JUnit, Selenium, Postman
AI/Data: TensorFlow, Scikit-Learn, OpenCV, PySpark
Methodologies: Agile, Scrum

EXPERIENCE

Software Developer Intern

Dec 2025 – Present

Aloft Technologies LLC (Remote, Omaha, NE)

- Contributing to full-stack application development supporting IT consulting initiatives.
- Designing, developing, and maintaining scalable applications under senior developer mentorship.
- Collaborating with cross-functional teams to gather requirements and implement technical solutions.
- Writing, testing, and debugging production-quality code to improve performance and reliability.

Graduate Assistant — IT Team

Dec 2024 – Aug 2025

University of Cincinnati, Graduate College (Cincinnati, OH)

- Engineered and supported enterprise IT infrastructure across Windows/macOS, Active Directory, Windows Server, SCCM imaging, and Microsoft 365.
- Deployed secure Windows images and provisioned endpoints at scale; troubleshoot distributed systems and hybrid collaboration platforms.
- Reduced recurring ServiceNow incidents by 30% via root cause analysis.
- Built a Python-based predictive asset management model, decreasing hardware failures by 90%.
- Administered authentication, server configuration, backups, and endpoint security compliance.

PROJECTS

Grocery Store Management System

Flask, React.js, Oracle SQL, JWT, AWS EC2

- Built a full-stack inventory and order management platform with role-based access control.
- Developed secure RESTful APIs with JWT authentication and Oracle SQL integration.
- Deployed backend on AWS EC2 and created interactive dashboards using React.js.

Sign Language Recognition System

CNN, Flask, OpenCV

- Developed a real-time ASL gesture recognition system achieving 92% accuracy.
- Integrated CNN model with Flask-based web interface for accessibility improvements.

Plant Disease Detection System

CNN, Flask, AWS S3, Lambda

- Built a CNN-based leaf disease classifier achieving 94% validation accuracy.
- Deployed inference workflow using AWS S3 and Lambda with Grad-CAM explainability.

EDUCATION

University of Cincinnati

Aug 2024 – Apr 2026

Master of Engineering, Computer Science

Jawaharlal Nehru Technological University

Dec 2020 – Jun 2024

Bachelor of Technology, Computer Science Engineering
